1. Acknowledgment is made of applicant's claim for priority based on an application filed in Korea on April 16, 1993. It is noted, however, that applicant has not filed a certified copy of the Korean application as required by 35 U.S.C. § 119.

- 2. This application has been filed with informal drawings which are acceptable for examination purposes only. Formal drawings will be required when the application is allowed.
- 3. Figures 4-6 should be designated by a legend such as "Prior Art" (see page 4, lines 2-3 of the specification) in order to clarify what is applicant's invention. (see M.P.E.P. 608.02(q)).
- 4. The drawings are objected to because at Figure 7 of the drawings, the signal "V29" at the output from frame position recorder 29 should also be provided to the recording formatter 3A (see page 19, lines 15-17). Correction is required.
- 5. Applicant is required to submit a proposed drawing correction in response to this Office action. However, correction of the noted defect can be deferred until the application is allowed by the examiner.
- 6. Claims 1 to 8 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
